SUMMARY

Product Designer with 3+ years of experience leading SaaS redesigns - from User Research and Product Discovery through Design System creation and Developer Handoff. Specialize in enterprise workflow design, scalable component systems, and translating complex business requirements into production ready products. Mentored a team of 3 junior designers while owning design quality across multiple concurrent product modules. Experienced collaborating across Product, Engineering, and Business stakeholders in fast-moving B2B environments. Recently expanded into AI-powered workflow design for a B2B procurement platform; currently pursuing IBM's AI Product Management certification .

EXPERIENCE

Product Design Consultant
April 2026

EffiGO Global

- Designed AI powered workflows for a B2B procurement platform - defining user flows for AI assisted sourcing, translating model capabilities and limitations into intuitive UI patterns.
- Built sample screens , wireframes and high fidelity prototypes using AI prototyping tools to accelerate client demos and stakeholder alignment.

Product Designer
Nov 2022 - Sept 2025

EffiGO Global

- Led end-to-end redesign of core enterprise SaaS modules in Figma — including the Sourcing Module — improving workflow clarity for 200+ daily active users through research, journey mapping, and iterative prototyping.
- Helped Build and maintain a scalable design system adopted across all product teams, standardizing components, color tokens, and spacing — reducing UI inconsistencies and cutting frontend rework.
- Owned developer handoff for all major product releases, creating structured Figma documentation with component specs, interaction notes, and edge case coverage — reducing implementation back-and-forth.
- Presented design decisions to enterprise clients, ran feedback sessions, and iterated on solutions while protecting core product integrity — achieving sign-off on major features without full revisions in most cases.
- Partnered with Engineering during feasibility reviews to assess technical constraints early, ensuring designs were frontend-scalable and implementation-ready before handoff.
- Mentored 3 junior designers through weekly 1:1s and design critiques, enabling the team to independently deliver across 2 concurrent product sprints and growing their ownership of end-to-end flows.

UI UX Intern
May 2022 - Aug 2022

WTA Design Studios

- Contributed to wire framing, UI design, and usability testing for client projects under senior designer guidance; supported design system documentation.

SKILLS

Product & Strategy

- Product Discovery
- Problem Framing
- User Research
- UserJourney Mapping
- Information Architecture
- Wireframing & Prototyping (Figma)

Systems & Delivery

- Scalable Design Systems
- Component Libraries
- Developer Handoff
- Frontend Feasibility Collaboration
- Interaction Design

AI & Emerging Skills

- AI-Assisted Research & Ideation
- AI workflow integration
- AI Prototyping
- IBM AI Product Management (In Progress)

AI Tools Explored

- Claude/ Claude Code
- Figma AI
- Cursor
- Warp
- Notion AI

EDUCATION

Professional Bootcamp in UI/UX Design *April 2021 - July 2021*
Design Boat UI UX School

Bachelor of Technology (B.Tech) in Information Technology *June 2018 - June 2022*
BV Raju Institute of Technology (BVRIT)

CERTIFICATIONS

IBM AI Product Management Professional Certificate
In Progress
